I am passionate about coding and problem-solving, dedicating full focus and energy to every task. I aim to gain recognition in the coding field, leveraging my skills and passion for technology to achieve meaningful results.

SKILLS

Front-End Development: JavaScript, TypeScript, React, HTML/CSS, Tailwind CSS, Bootstrap

Back-End Development: Node.js, Express.js

DevOps and Tools: Git/GitHub, AWS, VS Code

Real-Time Communication: Socket.IO, WebRTC

Design: Figma

Authentication and Security: JWT, Basic Authentication, API keys

Databases: MongoDB, Firebase, MySQL

EDUCATION

Web Development

Aug 2023 - Aug 2024

Prototype

I am currently engaged in a self-learning platform where I study, work on projects, and receive guidance and feedback from experienced technical experts. Since joining, I have significantly boosted coding knowledge and can now quickly learn new languages and software. I have completed training as a MERN stack developer, working on two main projects and several mini projects. Additionally, I have gained expertise in data structures and algorithms, further enhancing problem-solving skills

Diploma in Computer Engineering

Aug 2018 - Aug 2021

IPT AND GPTC COLLEGE SHORANUR

GPA: 7.2

Educational Qualifications:

- **Diploma in Computer Engineering:**
 - Completed a 3-year diploma program in Computer Engineering, acquiring a solid foundation in programming, networking, database management, and software development. Gained hands-on experience in building and managing computer systems, troubleshooting, and implementing various software solutions.
- **NCC Certificates (A, B, C):**
 - Successfully earned the NCC (National Cadet Corps) A, B, and C certificates, demonstrating leadership, discipline, teamwork, and commitment to service. Participated in various NCC activities, including drills, camps, and social service, contributing to personal development and organizational skills.

PROJECTS

WE TALKS

Jul 2024 - Aug 2024

Social Media Website

Project Overview: Developed a unique social media platform with core functionalities similar to Instagram, including creating posts, liking, and sharing. The project stands out by optimizing communication within the platform, offering a novel way for users to interact.

Key Features:

Core Social Media Functions: Users can create posts, like, and share content, similar to popular platforms.

Innovative Communication: Implemented a unique feature that allows users to engage in live video chats seamlessly within a shared space, similar to in-game communication.

Real-Time Interaction: Integrated live talking and video chat using WebRTC and Socket.io, enabling instant communication.

Technologies: MongoDB, Express.js, React, Node.js, Socket.io, WebRTC, GitHub, AWS, Tailwind CSS, Socket.IO

VKart

Dec 2023 - Jan 2024

E-Commerce Website for Electronics

Overview: Developed an eCommerce website focused on selling laptops, keyboards, monitors, and mice, providing a user experience similar to major platforms like Flipkart and Amazon.

Key Features:

- **Product Catalog:** Searchable catalog with detailed product information and reviews.
- **User Authentication:** Secure login and account management.
- **Shopping Cart & Checkout:** Functional cart and streamlined checkout supporting multiple payment methods.
- **Search & Filtering:** Advanced filtering options by category, price, and brand.
- **Order Management:** Real-time order tracking.
- **Responsive Design:** Optimized for mobile devices.

Technologies: Node.js, Express, MongoDB, Razor Pay, AWS, Bootstrap
